NO BULL TO WHEAT, BUT CORN ADVANCES.

WHEAT STARTED OUT WELL, BUT LET DOWN.

A control of the cont

Our market here was very much stirred up over the English cables reporting an advance at Liverpool, and there was a rush to buy and a quick sharp rise in values. The opening for Sept. was 'se higher at 1845c, and in a short time after that option was seiling at 6845c, while Dec. brought 715c and 725c. After the early demand had been satished, the market eased off some, the selling increasing somewhat, and Sept. went back to 69c and Dec. to 715ac. One reason for this was the increase of 1.543,000 bu, in the visible, which was much larger than had been anticipated. Liverpool, however, gained 45d more in price, closing 'gd than had been anticipated. Liverpool, nowever, gained % d more in price, closing % d
better for the day, but Continental market
cables were far from being encouraging,
Paris was unchanged to % ligher, Antwerp was unchanged and Berlin was % c
lower. Near the close of the day one of
those weak and bearish spells that have
been so characteristic of this grain of late
came over the market, and, owing to the fact
that Chicago broke down, traders who were
buyers early became sellers. The cash situation here was improved both in demand
and price, and there were sales reported of
125,000 bu. No. 2 red for Toledo and 40,000
bu. No. 2 hard for export, Chicago at the
same time reporting room chartered for
400,000 bu at the same rate as corn. This
did not check selling, which was mainly
by bears, and Sept. broke down to 88% and
Dec. to 71% 67%, the former closing 1-16c
lower for the day at 68% 67% cold closed its off latter the same at 71½c bid. Oct. dur-ing the day sold at 70c and closed ½c off for the day at 65½c nominal, while Aug. was nominally unchanged at 65½c.

The weather was the whole thing in the market for corn, and it was of such a nature as to have a buillish effect and sent the price up to a higher point than ever. Like wheat, however, this market was affected by a weak speil late, and aithough it showed a very good gain at the close, the best prices of the day were not maintained by considerable. The weather map on change showed undiminished heat and dryness throughout the West, and early information was to the effect that these conditions dammarket was buillish, particularly the amount leaving for abroad, and also the decrease in the visible of 2249,000 bu, but the amount affoat was increased 130 cm. market was builish, particularly the amount leaving for abroad, and also the decrease in the visible of 2 23,000 bu. but the amount afloat was increased 120,000 bu. Against 514,000 bu. A

mates point to about 123,600,000 bu, against 138,500,000 bu, last year. In France the recent hot weather damaged the quality of the wheat somewhat, and also the cats. Too much rain was reported from Germany. Dornbusch says that the English wheat crop on heavy lands priceents a line appearance, and some heavy fields will be reaped. Latest reports from Russia state that crops have been gainered under very favorable chromstances, and are about the average. The foreign reports on rye indicate that the French crop will be about 1000-1000 less than last year. The German crop is expected to be an average one. The reports of the receipts were in bad order, and only choice, fresh stock was wanted. Wool was dull and unchanged. There was no lelders not anxious to self.

BUT EASY AT

BUT EASY AT

Hides were quiet and steady at unchanged prices. Receipts were light and all offerings were readily taken.

Eggs.

The market was quiet and steady. Receipts were in bad order, and only choice, fresh stock was wanted.

Wool was dull and unchanged. There was no lelders not anxious to self.

THE SAME AS SATURD

BUT LET DOWN.

Corn Also Weakened Off From the Top, but Still Closed at a Very Fair Gain in Price.

Coffice Republic, Monday, Aug. 29, 1990.

There appeared to be quite a revival in appearance for the speculative interest in grain circles this morning, owing to a well-defined undertone of strength shown in all grain markets. They all started off well and the situation all round was in a much better and more encouraging position for awhite, from a lung time. But as usual they did not hold up, a much weaker feeling being developed later and a general let-down taking place. Speculative considerations at hand were about connected, but the weather conditions were occurred, but the weather conditions were concerned, but the weather conditions were concerned by the control of the control

New York, Aug. 20.—The market for cotton futures showed considerable irregularity to-day. On the opening call Aug. declined II points, while the rest of the list was 5 points lower to 2 points higher. For a time a pretty weak feeling prevailed. This was due to unsatisfactory cables and an almost entire absence of public speculative interest. Crop news, while conflicting, had a pretty bad average later in the session. The demand for shorts and the following report of damaging rains in Texas, with drought in the Atlantic States, carried prices up 11214 points from the lowest level of the forenoon. Trading was not at all active, as options were much at variance and neither one side nor the other was disposed to zet on their convictions. The late market was firm on covering and investment support. At the close the feeling was steady, with Aug. 7 points lower and other months 7 to 12 points net higher. Spot closed dull. Middling uplicated loc. do. Guil 104c; sales 103 bales.
